**Art Rejections:**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramamoorthy, U.S. pat. Appl. Pub. No. 2004/0213258.

Per claim 1, Ramamoorthy discloses a method for a data handling policy in a collaborative computing environment comprising:

- a)** storing the data handling policy for one of a person and a role on a computer storage medium (see par. 19, 27);
- b)** implementing the data handling policy in the collaborative computing environment by providing access to data in accordance with the established data handling policy (see par. 28-30); and

Art Unit: 2454

c) providing access to the data handling policy to a person affected by the data handling policy, i.e., administrator (see par. 27).

Ramamoorthy does not explicitly teach allowing the authorized user to view data handling policy. It is however noted that managing the policy typically requires the authorized user to interact and view the policy. For instance, handling a security policy would require the user to enter password, encryption techniques, etc.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to allowing such viewing in Ramamoorthy because it would have been enabled implementing Ramamoorthy's invention.

Per claims 2-3, Ramamoorthy teaches granting the user unrestricted access to shared data (see par. 30). It is noted that such data would include any data generated by one or more users.

Per claims 4-7, Ramamoorthy teaches allowing more than one person to change the data handling policy (see par. 27, 31).

Per claim 8, It is noted that many data handling policies would have required users to be notified of the existence of the policy, e.g., prompting users to change

passwords or selecting encryption methods, etc., (see par. 22-23).

Claims 9-20 are similar in scope as that of claims 1-8.
